

Arthrix®

Comprehensive Joint Health Products

The Arthrix family of joint health products utilizes a core formulation of ingredients (PurforMSM®, CM Kombo®, Ester-C®, OmniMin™) unlike any other available in the marketplace. In addition, Arthrix Joint Health products are formulated based on a progressive phase approach to joint health management. This phase approach refers to the incremental addition of the primary glycosaminoglycans required for joint health.

- ✓ Proven Chewable Tablet Palatability
- ✓ Easy Administration
